

Homework Grading Rubric

CSCI 3333 Spring 2026

Submission Requirements (100 pts)

To receive credit, all of the following must be met:

1. Program compiles without errors on the TA's machine
2. Program runs successfully and produces required output ("Assignment Complete")
3. All required materials are submitted
4. Assignment is submitted on time

Submissions missing any requirements are considered incomplete, resulting in a 0.

Reminders

- No late homework is accepted.
- Required file type: .cpp (and any required .h files).
 - o You may submit additional .h files if helper functions were added.
- File/folder naming conventions must match instructions exactly.
- One missing assignment may be submitted for full credit at the end of the semester (refer to syllabus).

Example folder structure for 'hwAC':

hwAC/

├─ autocompleter.h

├─ main.cpp

├─ words2.txt

└─ autocompleter.cpp <-- your work here

"My program works. Why did I get a 0?"

- If your code does not compile or run on the TA's machine, you may:
 - o Demonstrate it during office hours using code that is exactly the same as what was turned in.
- If required analysis was missing, you may:
 - o Provide a written analysis document

Homework grade adjustments are at the TA's discretion, but please reach out to me for any concerns.
